An act to add Sections 8238, 8238.1, 8238.2, 8238.3, 8238.4, 8238.5, 8238.6, and 8239 to the Education Code, relating to child care, and making an appropriation therefor.

LEGISLATIVE COUNSEL'S DIGEST

AB 172, Chan. Child care: state preschool programs.

Existing law, the Child Care and Developmental Services Act, establishes various full- and part-time programs for a comprehensive, coordinated, and cost-effective system of developmental services for children to age 13 and their parents. Other existing law, the Kindergarten Readiness Pilot Program, permits, until January 1, 2014, school districts to participate in the program to provide kindergarten preparedness opportunities to increase a child's readiness for school. Existing law requires the Superintendent of Public Instruction to administer state preschool programs including part-time day and preschool appropriate programs for prekindergarten children 3 to 5 years of age.

This bill would require the Superintendent of Public Instruction and the State Department of Education to administer prekindergarten and family literacy programs in accordance with specified funding and other requirements. The bill would require a participating program to provide specified child development and family literacy services as a condition of receiving funding. The bill would require a local educational agency on behalf of one or more participating programs to select a program coordinator who may be assigned one or more specified duties. The bill would make an appropriation by making \$50,000,000 of the funds appropriated in a specified provision of the Budget Act of 2006 for child development and preschool programs available for expenditure by the Superintendent for purposes of prekindergarten and family literacy programs, as specified. The bill would require the Superintendent to conduct an evaluation of the effectiveness of those programs, as specified. The bill would also make an appropriation by making \$5,000,000 of unearned contract funds appropriated in a specified provision of the Budget

Act of 2005 for general child care programs available for expenditure by the Superintendent to provide direct child care services for children in participating classrooms, as specified. The bill would require the Superintendent to encourage participating providers to offer full-day services through a combination of part-day preschool slots and part-day general child care and development programs.

This bill would appropriate \$150,000 from the General Fund to the State Department of Education for the 2006–07 fiscal year to administer specified child development and preschool programs.

Appropriation: yes.

The people of the State of California do enact as follows:

SECTION 1. The Legislature finds and declares all of the following:

(a) A compelling body of respected research demonstrates that quality preschool programs benefit children and their families, the public school system, public safety, the economy, and society as a whole.

(b) California has an enormous opportunity to reach children at a time when they are eager and ready to learn. 90 percent of brain development takes place before age five, making early childhood the best time to invest in preschool programs that boost learning, creativity, and social skills. Preschool programs lay a strong foundation that helps children succeed in school and in life.

(c) Quality preschool experiences boost academic achievement in school, decrease grade retention, decrease special education placements, and increase graduation rates. Quality preschool further reduces the likelihood of later arrest and incarceration, and increases college attendance and earnings in adulthood. A recent Rand Corporation report states that every dollar invested in quality preschool in California would return as much as two to four dollars to the public.

(d) Quality preschool experiences decrease special education placements, in part because they have the potential to provide early identification and intervention for young children with exceptional needs, which can reduce the need for ongoing special education services. Providing access to quality preschool for

children with exceptional needs can help support their development and prepare them for a successful transition to kindergarten and beyond.

(e) Research confirms the many benefits that children, parents, and preschool programs gain when parents are involved in their child's preschool learning both inside the classroom and at home.

(f) The Council of Chief State School Officers has found that efforts to reform and strengthen public education cannot succeed without a concerted effort to support and improve programs that provide care and education for our youngest children.
