

# How to connect your Salesforce account to DUO Mobile (MFA)

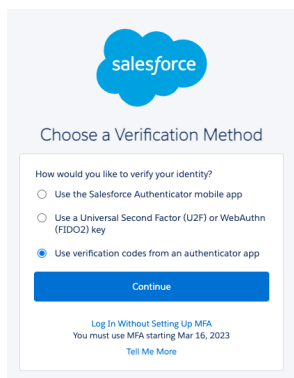

- 1 Download the DUO Mobile app from the Google or iOS App Store.

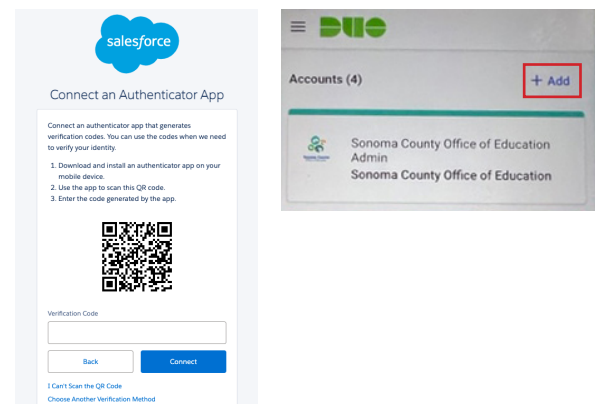

- 2 From a computer or a laptop, go to <https://sonomacoe.my.salesforce.com/> to login to your Salesforce account and click 'Login'. You will be asked to connect the Salesforce Authenticator app. Click on the blue text "Choose another Verification Method" below the "Connect" button.

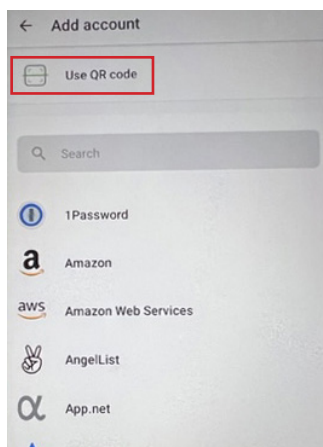

- 3 Select the third bullet point "Use verification codes from an authenticator app." Click "Continue".

- 4 Once the QR code is displayed on your browser, open the DUO Mobile application on your phone. In the DUO Mobile app, click "Add" on the top right corner.

- 5 Click on "Use QR code" on the top and point the camera of your phone to read the QR code on the computer browser. Rename the Account Name with Salesforce.

- 6 The Salesforce account will be added to the main page of the DUO app. Type on the name Salesforce to show a passcode. Type the passcode in the text box called Verification Code below the QR code on your browser. The passcode will be required for every access into Salesforce.
