Authentic Learning

Authentic learning is a term that describes learning through applying knowledge in real-life contexts and situations. This session will help participants understand and implement the four primary characteristics associated with authentic learning:

1. Involves real-world problems and mimics the work of professionals; requires presentations of findings to audiences beyond the classroom
2. Uses open-ended inquiry, thinking skills, and meta-cognition
3. Engages students in discourse and social learning in a community of learners
4. Allows students to direct their own learning in project work
