

SCASA

Sonoma County Association of School Administrators

Leading the Change in the 21st Century

Presenting a Power Breakfast with The Sonoma County BaySci Team

Offers Administrators' an opportunity to learn firsthand from teachers about the changes coming to Science Standards and how to support teachers with implementation.

The team is focused on transitioning to the Next Generation Science Standards

The Sonoma County BaySci Team is a group of ten K-8 educators representing nine districts in the county, and SCOE's Teacher-on-Loan for Science, Anna Van Dordrecht. This leadership team has received training and worked collaboratively this year, and they are poised to be a science resource for the county next year. They will give a general overview of NGSS, present examples from their own practice, invite you to participate in demonstrations, and share what's next for science education in the county. You will also have a chance to reflect on how to invite teachers to explore and implement NGSS together and in their own classrooms. We look forward to seeing you there!

BaySci Leadership Team
Tara Carter, Laura Barnard, Kim Walls, Jody Venard, Steve Williams, Carrie Barnes, Vicky Hill, Karen McGahey, Eric Brockway, and Mary Fitch; (In front) Carrie Forrest, Anna Van Dordrecht

Date: March 20, 2015
