

MATRIX: Out of Sight, Out of Mind: The Impact of Invisible Disabilities

Not all disability is visible. Humans tend to rely heavily on their vision to assess and process information. When disability is invisible, there tends to exist additional pressures and stigmas attached for the people who have them. Learn about the social aspects of disability and how people with invisible disability are affected.

This training will provide information on:

- What are the invisible disabilities
- How can we improve our interactions to be more inclusive and supportive

When Thursday, October 21, 2021 (AM & PM sessions)
10:00am - 11:30 am

Location ~ THIS IS A ZOOM TRAINING ~
