

Educating All Students in Mathematical Problem Solving: A Hands On Workshop for Educators

During this 2 session workshop, participants will engage in activities that will an understanding of how to help ALL students become mathematically competent. Time will be spent reviewing pertinent research and best practices. Participants will also have a chance to experience powerful math lessons. There will be a wide variety of tools and resources introduced to the participants that they will be able to turn around and use the next day in class. The expectation is that teachers try out one of these structures and bring student work back to the second session.

Learning Objectives:

- Participants will deepen their understanding of what is expected of students in mathematics in the 21st Century.
- Participants will learn several pedagogical structures and techniques to support mathematics learning for a diverse population of students.

When Part 1: Tuesday, January 23, 2018 and Part 2: Friday, February 23, 2018.
8:30 am - 11:30 am

Location SCOE, Redwood Room C

Presenter Joshua Deis

Cost Free

Audience All Educators. Attendance is limited to current employees of Sonoma County SELPA or Sonoma County Charter SELPA member districts and agencies.
