

DataWise Improvement Process

The DataWise Improvement Process takes school teams through an improvement cycle that happens in three phases. This cycle can support current school efforts, such as SPSA and LCAP goals. Teams first prepare by organizing themselves for collaborative work and building assessment literacy, then move into the inquiry phase where they dig into student work and teaching practices, and finally implement a plan to address a challenge they are facing. This work will be guided and supported throughout the year-long cycle by coaches.
